

Problems

2

Data Prepration

- Image-related preprocessing
- Text-related preprocessing
- Video-related preprocessing
- Annotation strategy

4

Output Characteristics

- Function
- Expression
- Control

6

Real-world Deployment

- Data pipeline
- System integration
- Organizational and operational factors

Start

1

Input

- Acquisition platforms and source type
- Datasets employed

3

Model Development

- Feature mapping
- Model architecture
- Temporal modeling
- Language decoding
- Training paradigm
- Adaptation strategy

5

Evaluation & Assessment

- Automatic
 - Text-reference alignment
 - Vision-language alignment
 - Visual understanding
- Human-centered
- Efficiency

End
